

# CVHC's Family of Services

**At  
home  
under one roof.**

**CardioVascular  
Home Care**

Our RNs have cardiac care unit/intensive care unit experience and bring expert care and treatment to your home. We'll help you live better at home and help you manage chronic heart, lung and vascular problems.

- Home telemonitoring daily
- Anticoagulation management
- In-home EKGs
- IV Lasix and antibiotics
- Cardiac infusion pumps
- COPD steroid protocols

**Orthopedic  
Home Care**

Our caring physical therapists and RNs help you get back on your feet at home after joint replacement or repair surgery.

- Home Rehab/Therapy Services following joint repair/hip and knee replacement

**Safe Choices**

**Senior Care Planning**

Special services for families and caregivers help seniors live independent lives at home with safety, security and regular home healthcare visits

- Certified Geriatric Care Managers help you find out what you need to stay independent and provide choices for care and services
- Customized care and monitoring, including medications and health assessments
- Planning for the future with families
- Geriatric counseling
- Home phone program

**Three exceptional home healthcare programs under one roof.**

We're here to help you. We work with your physician to get you the home health services and care you need. Contact us to learn more about our high-quality, innovative family of services.
